---

## PROFESSIONAL SUMMARY

---

Software Engineering undergraduate and Full-Stack Developer with hands-on experience building responsive, scalable web applications using React, Node.js, and REST APIs. Proven ability to design and ship complete full-stack systems — from JWT-secured backends to polished, production-ready UIs — including a hospital management platform and an AI chatbot powered by Google Gemini. Currently strengthening these skills through an active internship at Zerovertical Labs, with a growing focus on GenAI integration and automation. Seeking a Junior Full Stack Developer role in Karachi to deliver enterprise-grade solutions and grow within an innovative engineering team.

## WORK EXPERIENCE

---

### Full-Stack Web Development Intern — Zerovertical Labs

Feb 2026 – Present

- Shipped 10+ production features as part of a 7–10 member engineering team, building responsive React UIs integrated with backend REST APIs
- Collaborated cross-functionally with senior engineers to debug and test application updates, maintaining stability across all live feature releases
- Strengthened proficiency in React, Node.js, database design, and Git-based version control workflows while contributing to a production codebase within a 7–10 person team

## PROJECTS

---

### Hospital Management System — Full-Stack Web Application

Tech Stack: React, Node.js, Express.js, MongoDB, JWT

- Architected a 3-module full-stack platform (patient portal, admin panel, backend services) handling patient records, appointment scheduling, and staff management with secure JWT authentication and RESTful APIs
- Delivered the project across 46+ incremental commits, building a responsive React interface with complete CRUD functionality, form validation, and centralized state management
- Designed a modular, scalable architecture with clean separation of concerns between frontend and backend layers

### AI Chatbot — Google Gemini API Integration

Tech Stack: JavaScript, HTML/CSS, Google Gemini 2.5 Flash API

- Developed a fully functional AI chatbot integrating Gemini 2.5 Flash API with multi-turn conversation memory across sessions
- Implemented multimodal input support across 2 input types (text and image), enabling richer AI-powered responses
- Engineered the complete API request/response lifecycle, including robust error handling and loading states
- Added file upload, emoji picker, and other dynamic UI features to create a polished end-user experience

---

### YouTube Clone — Frontend Application

- Built a YouTube-style interface with dynamic video listing and search functionality
- Implemented fully responsive layouts across multiple screen sizes and devices
- Managed application state and real-time UI updates for a smooth browsing experience

### EDUCATION

Bachelor of Science in Software Engineering

Feb 2023 – Feb 2027

Sindh Madressatul Islam University, Karachi

### TECHNICAL SKILLS

- Languages: JavaScript, HTML5, CSS3Market
- Frontend: React.js, Next.js, Tailwind CSS, Responsive UI, Figma to UI
- Backend: Node.js, Express.js, RESTful APIs, JWT Auth
- Databases: MongoDB (Mongoose), MySQL, SQL (Basic)
- AI & Integrations: Google Gemini API, GenAI Development
- Tools: Git & GitHub, Debugging & Troubleshooting

### CERTIFICATIONS

- Full Stack Development — NAVTTC, Prime Minister's Youth Skills Development Program (2024)
- Full Stack Development — TIHES Helpers Institute of Emerging Sciences (2024)
- IT Specialist – JavaScript — CertNexus & Pearson VUE (2024)
- Web and Mobile App Development — Saylani Mass IT Training Program
